

Annotations in Balsamiq

Markup in Balsamiq does the task of Annotations.

The option can be found as shown on the below screen

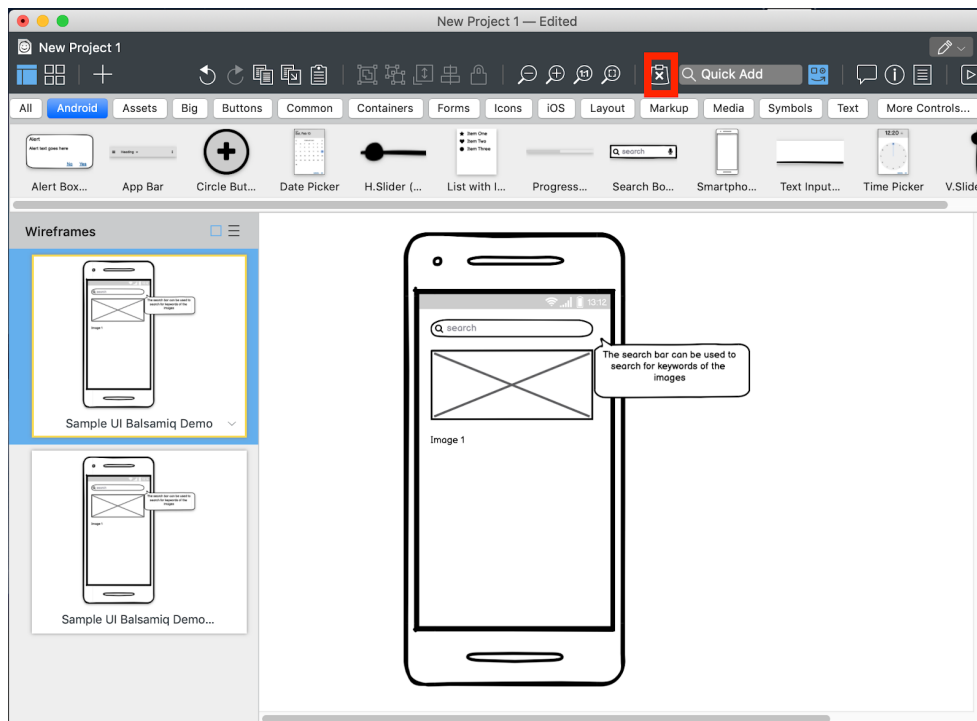

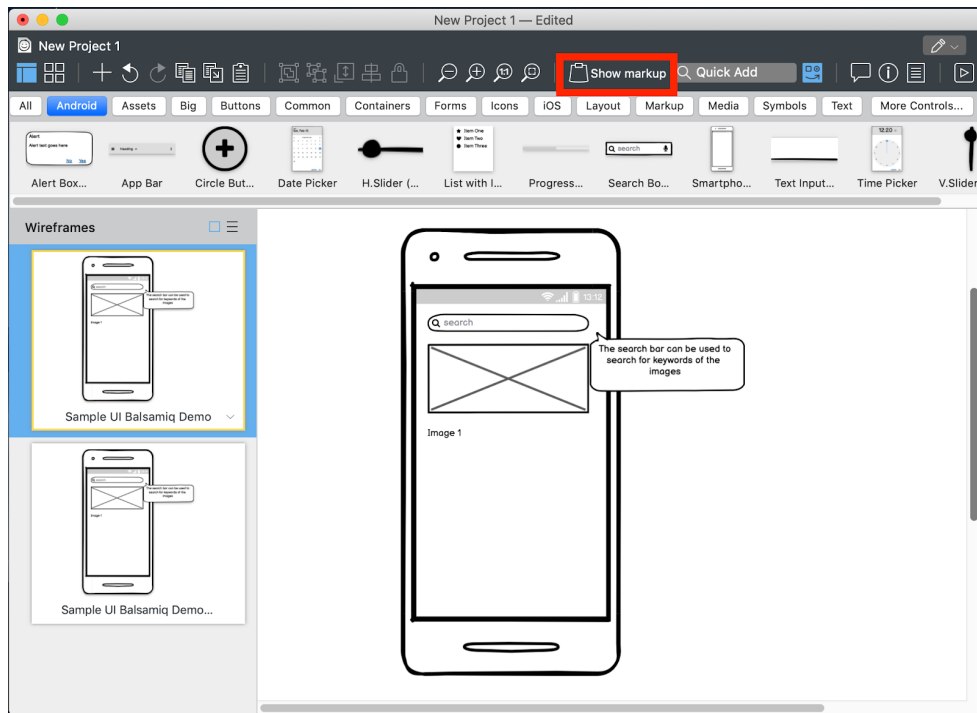

The Show Markup icon (as I have highlighted in the below screenshot) can be used to show/hide markups.

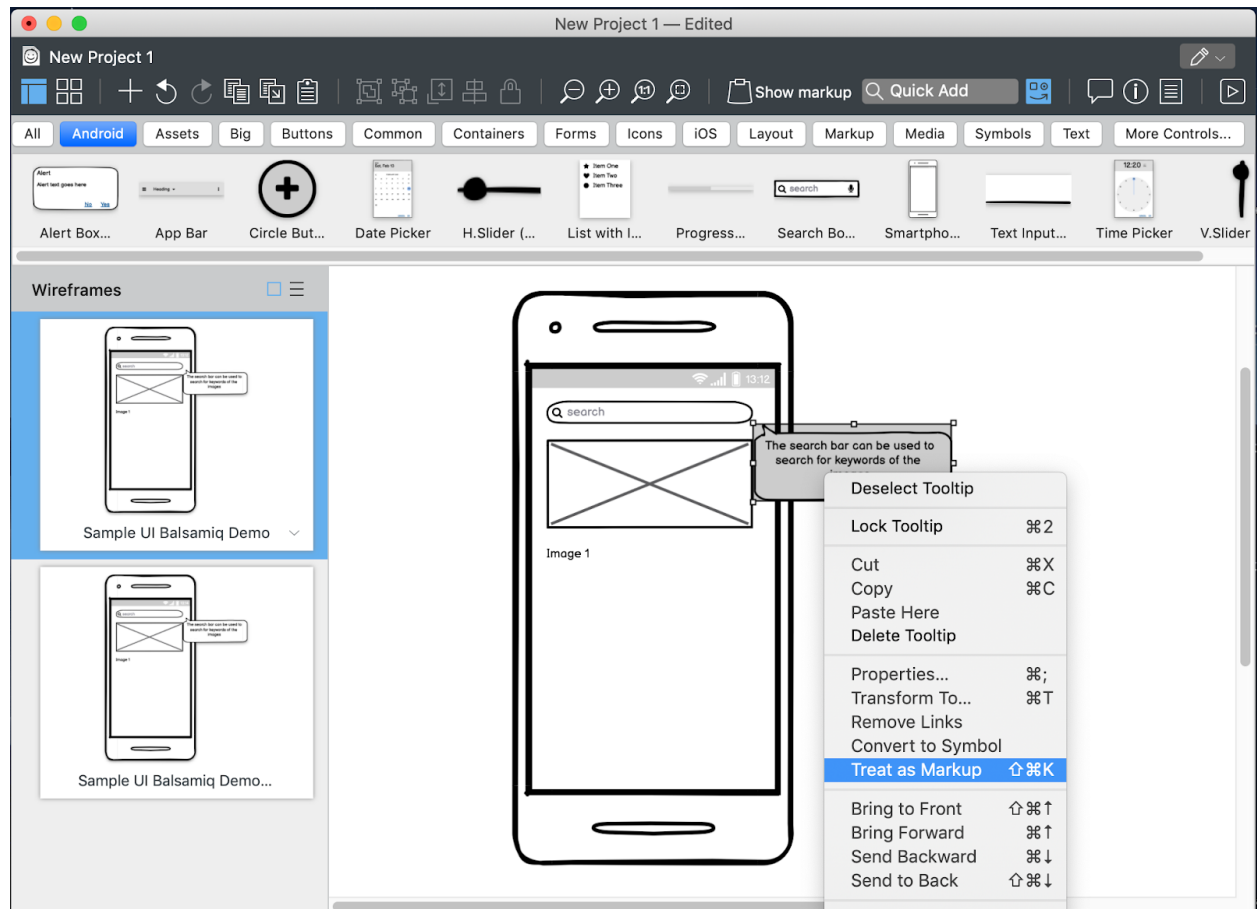

Also, we can mark our own created shapes/icons as markups.

For eg, I have created a ToolTip as follows

Note that the tooltip is visible even if the markup is hidden

You can convert the ToolTip to a Markup as follows:

After treating as Markup
